## **CRYSTAL SHINE**

**German Hybrid-Nano Technology**

**NANO HYBRID POLYMER**

## **Crystal Shine**

WOW Crystal Shine is an easy to use wax created with Hybrid-Nano Polymer Technology from Germany.

- Hybrid-nano Polymer Technology results in a Crystal shiny surface
- Removes polluted stain from brake dust, exhaust soot and water droplets.
- Enhances the colour of the surface to the original tone
- Creates a nano film that protects the paint from UV rays and helps prolonging its lifespan.
- Hydrophobic hard surface prevents water-beading and staining
- Has the ability to remove micro scratches

**BEFORE**

**BEFORE - AFTER**

**AFTER**

## 1. Wash and Dry

Wash the car thoroughly to remove all dirt and dust from the surface. Upon completion, wipe off the surface to ensure it is completely dry.

## 2. Shake Well

Prepare a WOW Microfiber Applicator Cloth, then shake the solution vigorously until there is no noticeable layers in the solution.

## 3. Application

Spray on surface preferably work from one panel to another panel. Spread the solution with WOW Microfiber Applicator Cloth.

## 4. Wipe-Off

Finally, use WOW Super Cleaner Microfiber towel and wipe off.

## WASH & WAX

*German Hybrid-Nano Technology*

NANO HYBRID POLYMER

**Cleans and shine in one action.**

Hybrid-nano technology breaks surface tension lifting grime and dirt resulting in a shiny hydrophobic surface.

- Hybrid-nano technology breaks surface tension lifting grime and dirt
- Wash and wax simultaneously
- Removes dirt with ease
- Does not affect existing coating
- Provides shine and smoothness
- Protects the auto paint from UV rays
- Does not leave any residue
- Pleasant scented.

**BEFORE**

**BEFORE - AFTER**

**AFTER**

## 1. Rinse and Remove

Rinse and remove as much dirt as possible with water from hose.

## 2. Preparation

Shake well before use then add about 25ml (4 capsules) of WOW Wash & Wax in a pail and add about 4 liters of water preferably with a running water hose to work up the foam.

## 3. Application

Apply the mixture with foam throughout the vehicle preferably starting from the top of the car to the engine hood and boot cover and finally the sides. Recommend to use with a high quality wash mitt like our WOW Washer Mitt

## 4. Final

Rinse vehicle thoroughly from the top with the running hose and dry the vehicle immediately with WOW's super thick high absorbent WOW Super Dryer Towel.

## **TIRE CONDITIONER**

*German Hybrid-Nano Technology*

NANO HYBRID POLYMER

## **Tire Conditioner**

is a result of research into a safe water-based Hybrid-Polymer Technology product compatible to tire rubber that has anti-UV properties to provide a long lasting high-gloss and rich-black protection to the tires.

- Protects against UV damage and browning
- Leaves rich black glossy surface
- Long-lasting protection against UV, road chemicals and dirt
- Helps darken and shine the tires naturally like new
- Non-greasy.
- Prevents the tires from cracking or drying and helps prolonging the tires' lifespan.
- Compatible to all tire rubber

**BEFORE - AFTER**

**BEFORE**

**AFTER**

**1.** Clean and Remove Dirt  
Remove all dirt and soil from the tires before application. WOW Tire Conditioner works best on clean tire surface.

**2.** Preparation  
Shake well before application

**3.** Application  
Spread on the outer surface of the tire.

**4.** Final  
Wipe off any excess especially on the surface where the tire is in contact with the road surface
